

**AMENDMENTS TO THE SPECIFICATION**

**Page 10, paragraph 2, please amend as follows:**

The allowing member 35 (allowing means) is disposed in continuation with the first sliding member 31 and the second sliding member 32 and facing the guiding member 34, with the supporting axis 121 (the contact member 33) disposed in between. An apparent arc track R is disposed on the allowing member 35 with the output lever 131 as its center. The allowing member 35 allows the movement of the protrusion 20 of the output lever 13 when the output lever 13 slides between the first position and the second position at the time when the worm wheel 12 is not turning.
